

D JONES TESTIMONIAL

Dear Silvano

Several years ago, my wife and my self decided to build our first new home. After many enquiries and searching numerous catalogues, we finally decided the Homefab style of steel frame home was the best option regarding cost and strength of the building.

We found staff at Homefab very helpful and the kit arrived on site quickly complete with a very user friendly manual for erecting the building.

The men helping with the building commented on a number of occasions regarding the frames being so straight and square and easy to fit together.

The building took us only four weeks to complete from digging post holes to being ready to paint.

We are very satisfied with our Homefab and the service from the Homefab staff.

Yours faithfully,
Douglas J Jones
