

C & J VANDERBYL TESTIMONIAL

To Whom It May Concern,

We are proud to say we have had the pleasure of building a Homefab house.

Originally we did the rounds of all the kit home companies Australia wide and eventually narrowed the list down to Homefab. We found they were the only company who used box sections in the floor joists, had a W50 wind rating and were within a price range that we could afford.

As we wanted to use our own design Silvano was more than willing to oblige us. He also put suggestions to us which he thought would improve the house. We found Silvano and his team more than helpful in getting our house ready to the stage where we were ready to build,

The instruction manual arrived first so we could accustomise ourselves to the project we were about to take on. We found it well put together with step by step instructions. As long as you read the manual thoroughly, you really can't go wrong. Anything we weren't sure of we could just ring Silvano, night or day, office or home, and he would answer any queries we had.

When the kit arrived we found it to be strong and well constructed. Everything was there. Thankfully, it arrived in stages for what we needed at the time, otherwise it could have been quite a problem storage wise. Silvano was in constant contact with us, by phone and on site visits, making sure that everything was going together as planned and that we had sufficient material, i.e. screws etc. If per chance we needed more of anything, it would arrive the day we required it or if not the following day.

Even though Homefab only supplied our house to Lock-up stage, Silvano has still kept in contact with us seeing how the house is going and giving us any suggestions or helpful hints which he thought would be of assistance to us.

We would have no hesitation in recommending Homefab to anyone who is thinking about building a house. We are proud to say we built a Homefab house and that we did it ourselves.

Regards
Chris and Janneata Vanderbyl
