

## A WEBB TESTIMONIAL

Dear Silvano

I have never been more impressed with anything for construction purposes than Homefab Steel.

All corners were within 90 degrees give or take 2 or 3 millimeters. The plans were adequate and almost all fittings fell into place, and were easily installed.

With an average of 3 assistants, the frame was up within 10 working days. After sales was brilliant, with some variations done immediately.

I would have no hesitation of ongoing recommendations.

Thank you  
Allan Webb
